

From our family to yours ...

... quality workmanship and a highly-skilled, responsive team of professionals ready to serve you! At **KELLEHER**, we take pride in offering Richmond-area residents all-season home comfort with superior heating and cooling installations, reliable heating oil supply and expert electrical and plumbing service.

Nearly four decades after Mike Kelleher and his son, Joe, started Kelleher Oil Heat in a one-room office on the Boulevard, the company has grown to involve three generations of Kellehers in its management. Over the years services have expanded — as has our “family” of staff and technicians whose dedication to quality care is surpassed only by Kelleher’s customer loyalty. Indeed, our customers are our best referral and we deeply value this trust. Kelleher’s commitment to customer satisfaction is built through honest and reliable business practices.

With the passage of time, **KELLEHER** has matured into a leading provider of heating, cooling, plumbing and electrical services for residences and small businesses.

We value our technicians because of their experience, knowledge and abilities. Most have been with Kelleher for 15 years or more. Typically our technicians come to us after earning certificates or journeyman's designations from technical schools. Kelleher's tuition plans encourage employees to engage in lifelong education.

Serving you every day of the year

Kelleher's associates are here to serve you. From the moment you place your call, we respond. During office hours seasoned schedulers assess your problems and select service technicians accordingly. After-hours calls are taken by a manager on duty. In both instances our intent is to save you time and money by analyzing your situation. We may offer home remedies if appropriate — being mindful of your schedule and budget — or send a technician immediately if the problem warrants an emergency response.

The company's orange-and-blue vans are kept in a state of readiness so that we can serve you promptly whether the temperature is 9° or 99°. We even have our technicians drive the vehicles home to provide a quicker response overnight or first call in the morning.

Kelleher rarely uses subcontractors. There's a good reason for this. We want to ensure that you receive only the highest quality workmanship and materials, and that we arrive on time, when we say we will.
